**Subject:** Three week update November 14, 2016

On November 07, 2016 DEQ received the most recent update from Carl Burnham of IRS Environmental regarding the quantity of Asbestos material removed from the CFAC site. A current cumulative total of 69,900 pounds of regulated asbestos waste has been removed from the facility(an increase of 1,940 pounds since October 1st). The waste disposal receipts for October indicate the removal of an additional 72,770 pounds of non-regulated asbestos material, yielding a “to date” non-regulated asbestos total of 1,067,960 pounds. Structures included in this removal include the West Rectifier, Rod Mill Building, Paste Plant, Quonset Hut, West Aluminum Unloader, Compressor Building, Laboratory, and Change House.

An asbestos project permit is in place through 2016 for the East Rectifier building and through December for “Change House”. Demolition notifications remain in place for the East and West Rectifiers, Rod Mill Building, Laboratory Building, Building 1 complex, and Change House.
